

MAKE YOUR OWN SUPER STARS

Step 1: Grab your cutting tools and some nice yellow paper (just regular copy paper will do) and cut a strip of paper along the short edge of the sheet. 1cm strips work best.

Step 2: Loosely tie a knot in your paper towards one end of the strip.

Step 3: Gently pull the paper tight (without crumpling) and flatten the knot.

Step 4: Tuck the short end of your strip back into the knot. If it's quite long you can trim it back to about 1 cm so it tucks in neatly.

Step 5: You should have ended up with a pentagon shape at the end of your strip.

Step 6: Fold the rest of your strip around the pentagon, keeping the shape. When you reach the end of the strip tuck in the end in the same way you did before.

Step 7: This is the more tricky part. Take hold of the shape and pinch in around the corners, creating dimples in the edges of the pentagon. The shape will start to puff out, and your star's points will start to form. Do this for all 5 points.

Step 8: Carefully draw black lines for your star's eyes on your favourite side (or both), and you're done!
