

How to play

PAPER TETRIS

Setup:

Cut out all of the coloured Tetris pieces and place them into a pile. Shuffle the pile as much as you'd like. This will be your draw pile. Have your paper grid in front of you with your draw pile on one side.

Gameplay:

- Draw one piece from the draw pile at a time and try to fill the board from the bottom up. You can rotate the pieces in any direction to make them fit (as long as they match the grid).
- As the board fills up, move the pieces down the board manually to make them “drop off” at the bottom of the page.
- The goal of the game is to have as little white spaces as possible. For a greater challenge, don't allow any spaces with white spots to drop off the bottom of the page.
- Play until the board fills up.
- For a shorter game, don't make the pieces “drop off” the bottom of the page.
