

# Don't Wake the Shark Instructions

## **Setup:**

1. Glue the pages onto cardboard and paint a thin layer of Modge Podge over the surface.
2. Leave to dry.
3. Paint another layer of Modge Podge over the raw cardboard side and leave dry.
4. When the modge podge is dry cut out the square tiles.

The modge podge acts as a sealing agent to keep the tiles nice and it can be substituted with clear drying liquid glue or omitted all together.

## **How To Play:**

1. Shuffle and lay out all the tiles graphic side down on the table.
2. Each player takes turns picking up two tiles, and keeps the matching pairs to one side.
3. If a player turns over a shark.... they miss a turn.
4. The first person to find the 'only' matching clown fish pair wins!
