Make Your Own DIY Rainbow Game

Rainbows, colors and cooperation. What could be better? This game has all these things. Use your creativity to add whatever you can imagine.

Page | 1

Target Skills:

-  Color recognition
-  Turn-taking
-  Coloring and Drawing Skills
-  Counting (optional)

Materials:

-  Large Paper or the game board (below)
-  Dice and Crayon templates (below)
-  Crayons
-  Tape

Instructions:

The rainbow has lost its colors. Move the crayons across the path to the rainbow and give it back its colors! Cut out the dice and crayon templates below. If you are working on color recognition color use the dice with different colors to match the colors of the game squares. If you are working on counting and number correspondence then use the dice with numbers. Take turns rolling the dice and moving the crayons across the path to the rainbow. Draw a picture with the color that you landed on. For example, you landed on yellow square draw a yellow flower. You can also combine the two dice and move to that color space and draw the amount of things indicated by what number was rolled. For example, you roll both dice and get yellow and the number five. Draw five bananas or five suns or whatever else you can think of that is yellow. When your crayon gets across to the rainbow, color in one strip of the rainbow with your color. When everybody gets to the rainbow and adds their color, you all win!

Extend the game by having the players draw a large rainbow together on the other side of the game board.
