

# Make Your Own Straw Rocket!

## Materials:

- Straw
- Markers or crayons
- Rocket Template (provided)

## How to Make it:

1. Colour in your rocket of choice.
2. Cut out the template. There are two pieces to the rocket- the rocket and the rectangle that you roll to put the straw in.
3. Roll the rectangle the long way with the fold line on top. You can roll it with a pencil to get it tight enough. Tape it along the sides to secure it.
4. Fold it over at the top on the part that says fold. Secure the fold with tape to keep it down.
5. Tape the rolled piece to the back of the rocket.
6. Insert a straw and blow the rocket up into the air~ again and again and again!
